Providing technology services to improve Network, Application, and Data Management.

Increase Network Performance - With DataCast Managed Services, your hardware and network infrastructure are monitored 24/7, reducing system downtime and improving overall network performance

| | |
|--------------------------------------|---|
| Network Management | Turnkey management that includes New Installations and Upgrades, 24/7 Remote Monitoring, Management Reporting. |
| Strategic Planning | For companies that have outgrown their existing network, we can assist in the planning and design of infrastructure enhancements. |
| Help Desk / Technical Support | Remote-control monitoring and trouble-shooting Patch application and management Anti-virus protection |
| MS Exchange Hosting | Enjoy the benefits of Microsoft Exchange Email capabilities without the burden of managing the physical server and administration responsibilities. Offered on a per user basis |

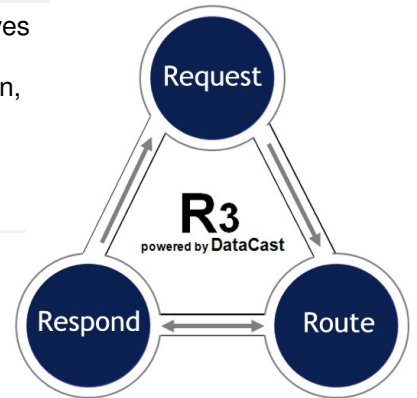

Improve Organizational Efficiency - Providing software solutions that improve organizational efficiency, our **R3** application enables dynamic workflow that automates and streamlines information flow within your organization.

Corporate Intranet Portal

Deployed as a Corporate Intranet portal, **R3** improves communication and information flow within your organization: Multi-Divisional, Cross-dept integration, Dynamic Content Management and Global Search capabilities from a single web portal.

Workflow / Process Management

R3 automates common processes within your organization. Data-driven processes and dynamic routing sequences enable real-time tracking and notification to appropriate parties.

Business-to-Business (B2B)

Planned for 2011. Expanding **R3** to incorporate B2B transactions, **R3B2B** extends workflow to track tasks and activities among business partners.

| | |
|------------------------------------|---|
| Custom Software Development | In addition to our packaged applications, we develop custom software applications for unique customer requirements. |
|------------------------------------|---|

Safeguard Critical Data - Via our Secure Data Center and partnerships with other Service Providers, your applications and critical business data are protected in a secure environment, and readily accessible if a disaster occurs.

| | |
|-------------------------------------|---|
| Full-Scale Disaster Recovery | We offer a complete, affordable backup and disaster recovery (BDR) solution incorporating on-site data replication, off-site storage, and server virtualization in the event of hardware failure. Utilizing Network Attached Storage (NAS) Servers, a variety of models are available to fit any size business. |
| Application Hosting | Hosting capabilities for web and corporate applications, in a safe, secure environment. |

Success Stories...

Increased Network Performance...

Real Estate Management and Construction Company...

DataCast lead us through a successful overhaul of our IT systems. As expected, we received professional advice on IT strategy issues and the implementation of the initiatives went very well. Equally important to us was their guidance that allowed us to make sound business decisions regarding our IT systems”...

“We rely upon the DataCast team to manage our day-to-day IT operations – network management, server administration, help desk, and disaster preparedness. We receive responsive service and seldom experience unplanned downtime...”

Accounting and Financial Services Firm...

“We are a managed services customer. Our network, desktops and laptops are routinely kept up-to-date with the latest virus protection and operating system updates. Much of DataCast’s support is provided via remote access, which minimizes interruptions in our workplace...”

“We also rely upon DataCast to host our enterprise email, utilizing Microsoft Exchange. We enjoy the robust functionality provided by Exchange, but are not burdened with the maintenance and administration functions required to support the application...”

Property Title Insurance Firm...

“DataCast assisted us with an office relocation and network upgrade, including the implementation of a disaster recovery plan. They provided a robust, yet affordable solution that backs up our production servers, incorporating on-site data replication along with offsite storage...”

“We are very satisfied with both the solution and the level of service we receive from DataCast...”

Family Dental Center...

“DataCast helped educate us on the need for an adequate disaster recovery plan and presented us with affordable options for our environment. We have implemented an on-site NAS with bundled offsite storage, protecting our applications and data. Our fully-implemented solution costs us less than \$100 per month...”

Safeguarding Critical Data...

Improving Organizational Efficiency...

Lawn and Garden Wholesale Distribution Company...

“We hired DataCast to implement our corporate intranet strategy and have been very pleased with the results. Our Intranet provides our employees with a common portal for information sharing. All of the types of information we routinely use—news, announcements, job posting, employee listing, documents, product images, etc. – are now searchable and accessible from a single location...”

“Each Department has its own home page with content applicable to its area. The flexible security levels allow us to customize the features and functions that our employees access. ...”

Technology Services Firm...

“As a growing technology services firm, we rely heavily upon our Corporate Intranet and R3 workflow, powered by DataCast. Our Intranet provides a common portal for our employees to publish and retrieve information – brochures, legal agreements, customer proposals, etc...”

“R3 has allowed us to automate the processes related to new customer approvals, customer equipment orders and tracking technical support requests. The dynamic routing capabilities ensure that processes keep moving, and provide a built-in audit trail for reporting purposes...”
